"The collection of coins has not only become an infatuating and engrossing pursuit among thousands of persons of all ages and either sex, but out of it has grown up an extensive trade, furnishing the means of livelihood to numerous individuals in all our large cities. Prices have risen a hundred fold, in some cases almost incalculably; unreasonably; and speculation has been rife...

(from The American Journal of Numismatics, Vol. 1,No.1, May 1866.)

OUR TERMS OF SALE

1. All coins are guaranteed genuine. I will replace or issue a refund for any coin found not to be genuine. This is a lifetime guarantee. Over ten years of business I have never had to make good on this promise. But I make it anyway for your protection.

2. All attributions are guaranteed correct. Also a lifetime guarantee. I will issue a refund or if available provide a replacement for any coin found to be mis-attributed.

3. A full thirty day return privilege is allowed on all purchases. Returns may be made for any reason, or no reason. My business depends on attracting repeat customers. It does neither of us any good for you to keep a coin with which you are not completely satisfied. I am confident that the overall quality and value of the material I offer here is second to none. This does not mean that you might not order a coin that fails to satisfy your personal taste or desire. It is even possible for me to have missed a defect or to have been been optimistic about the grade. It can happen. But it is not my intention. I encourage you to use the thirty days as an approval period. Feel free to show your purchases to other knowledgeable EAC members. Get a second opinion. All sales are final after the thirty day period, though I will certainly consider an extension upon reasonable request.

4. Approval service is also available to established clients. Seven days inspection is allowed on approval service at which time the coin must be returned or funds remitted. Approval sales are considered final after the seven days. Extensions are available upon request.

5. All orders are sent postpaid.

6. Strict ANA and EAC guidelines are followed in grading.

In addition to strict ANA and EAC guidelines I have introduced "value" or "net" grading into my descriptions. Sharpness or technical grade according to ANA standards is fairly easy to describe with consistency. However most old copper coins have acquired defects over time that detract from the overall desirability of the coin. I describe these defects and deduct from the technical grade based on their presence. As an example a coin might be described: "1805 S-267

VF20 Sharpness of VF30 with smooth brown surfaces, some light pinscratches where corrosion was removed at K1 reverse." Here is a coin VF30 by ANA standards but with scratches at one o'clock on the reverse. Plainly the coin would be more desirable were the scratches not present. I describe the defects and deduct ten points from the overall grade. The first grade listed represents the net or value grade. Clearly this is an art and elements of subjectivity are inevitable. Where there is no second grade listed.

It is my opinion that the net grade is the same as the sharpness grade. Perhaps not perfection but whatever marks present have been judged to be consistent with the technical grade of the coin and do not detract from the net grade. The intent is for you to have as close an idea as possible of the overall condition of the coin you may wish to purchase. No unpleasant surprises!

7. I attempt to give a rarity rating for each variety listed. These in large part reflect the current EAC rarity ratings as compiled by Jack Robinson's Copper Quotes. I also offer opinions relative to condition census ratings die state and condition rarity. These change constantly as new coins are discovered and reported. I attempt to use the latest data or information available. Still these ratings cannot be 100% accurate and remain a matter of opinion only.

Having said this I can also say with confidence that more information and more research is available on Early Copper than any other area of American Numismatics. Large Cents have been actively collected and researched for more than one hundred years. One can therefore have a high degree of confidence in the general accuracy of current information. I urge all my clients to form the numismatic library necessary to allow them to make informed judgments and purchasing decisions. It is foolish to invest money in coins if you have not already invested in the books and other sources necessary to the full enjoyment of them.

8. I have yet to meet anyone who has bought coins merely as an investment who has realized a net return upon liquidation. I have, however, met numerous serious collectors, who having formed a discriminating collection over a period of years realized a substantial profit when their collection was ultimately sold. Most collectors find that the enjoyment, education, and friendships formed as a result of their collecting pursuits have been their greatest reward. It is much easier to lose money quickly than to make money quickly in rare coins. If you are not willing to undertake the educational process necessary to make well informed decisions regarding your collection you will almost certainly lose.

Coin dealers are often more than willing to give investment advice. As my good friend Jack Robinson, (whose collection did very well for him when it was sold in 1989),likes to say. THINK ABOUT IT! When you

ask a cat which canary to buy remember his first concern may not be how well it sings! There are many opportunities to do well financially in rare coins. But as with any other medium of investment, success is the result of a combination of knowledge, good timing and the ability to wait for the right time to sell. Commit yourself to the process of becoming an educated collector and you stand a good chance of success.

Chris

COMMENTS

THE WALTER DUDGEON SALE

The recent Walter Dudgeon sale was a pleasant surprise to everyone: the consignor, the catalogers and the participants. It had been over five years since the Jack Robinson and Bob Matthews sales which generally are regarded as the height of the middle date market. Since that time a number of the most aggressive collectors have moved into other areas or have largely completed their collections. A couple have sold their collections and are no longer active. The perception has been that the market for middle date cents is weak. Because of this, the anticipated results for this sale were mixed. With an investment in the 200k area our pre-sale hope was that we might obtain a hammer price for Walter of 250k. But after the last lot was hammered down the prices realized totaled $341,608; over $375k after the 10% buyers fee is figured in the total!

The first lot sold did not presage such a good result. An 1816 N-1 VF25 netted down from EF40 that had brought $850 in the Matthews sale saw the bidding stop at $360; about 25% less than CQR value. However, three lots later a beautiful 1816 N-4 MS63 (Ex Starr-REN) brought $2750 —twice what it brought in the EAC 1989 sale! Two lots later the MS60 1816 N-7 brought $1550; again about double the $800 required to win it in the 1988 Oechsner sale. The impaired proof 1821 N-2 with facial scratches brought $3600, only marginally more than at the $3000 it brought in the Robbie Brown sale. But only a few lots later the MS63 1822 N-10 purchased several years ago for $1050 brought a strong $3900. A 24 N-3 again from Oechsner brought $1550 compared to the $550 of five years ago. The early die state 1826 N-8 had received a lot of attention in pre-sale viewing both at EAC and prior to the sale at ANA. The $625 it had generated in Stacks 3/87:78 sale proved to be ancient history as a $1600 bid took it here. The 1827 N-1 was a different story. Close to mint state sharpness but netted down due to some corrosion and burnishing, it could be netted no better than EF45. A relatively strong bid of $410 took it took it to a new home. Perhaps considering only three mint state specimens exist the opportunity to obtain a better specimen may not come along soon. Still Walter may wish he had passed on the opportunity to acquire this for $900 from Oechsner in 1988. A predictable pattern was emerging. Any choice or problem free coin, mint state or circulated, created interest and brought a strong price. Problem coins, coins requiring substantial deductions or those lacking original surfaces attracted only grudging interest and the bidding was soft.
Perhaps this is an appropriate place to briefly address an issue that has come up several times recently. How much does surface originality or the lack of it affect a coin?. What constitutes a cleaned coin? How much does recoloring affect the grade?. Or the value? I can't possibly answer these questions fully because every coin is different. Certainly original surfaces matter more on proof

or mint state coins than on lower grade or well circulated coins. Virtually all coins have been cleaned at some time in some way. Remember even brushing a coin with a soft camel's hair brush is cleaning it and if done improperly can damage the coin! What we are talking about is the manner of cleaning and the individual tastes of the collector or the pool of collectors at a given time. Cleaning may increase or decrease the value depending on who the collectors are and their individual likes and dislikes at any particular point in time.

Let me use two of the above coins as an example. The 1827 N-1 was described as a recolored coin at the time of its sale in 1988 but emphasis was placed on its outstanding strike. At the TJ Clarke sale in 1956 it was described as a semi-proof! Today collectors pretty much unanimously agree that even if the original color was uneven or a little dark and there were some surface marks, the original condition would be preferable to a burnished and recolored coin. But did collectors feel this way in 1956? Perhaps not. Ok, let's take the 1824 N-3 as an example. Here is a coin with atrractive original lustrous surfaces. It also is described as having "a few flecks of lt verdigris around ATES OF AM." We can all agree that the coin would be nicer if it were absolutely original **and** absolutely pristine. But the question for today's collector is will the coin be improved if the specks are removed? How much of the originality of surface are you willing to sacrifice for a pristine surface? There are certainly solvents available strong enough to remove the verdigris from the reverse. Will they alter the surface? Any scientist will tell you the the absolute answer is yes, the solvent will alter the surface. A subsidiary question would be: is the verdigris active corrosion which is in the process of itself altering the surface or simply inactive surface crud? Each collector will answer these questions for themselves with no guarantee that other collectors or that future collectors will answer the same. One thing to keep in mind though. These cents have have endured over 150 years. If still in original condition any reasonable amount of care will prevent nature from changing them. But once we decide to alter them the end result is a matter of skill and luck. The high percentage of original, untampered with coins in this sale undoubtedly contributed to the outstanding results. Certainly in the case of the 1824 N-3 collectors felt it was just fine as is-and expressed that opinion with a price three times that of the 1988 sale. The Semi-proof 1827 N-1? There are plenty of collectors who will still find it desirable. Especially so when accurately described at a commensurate price. But as what follows shows, the market for the real McCoy non-semi-proofs is pretty healthy as well.

There has not been a truly significant offering of Large cent proofs at auction in several years. The dispersal by private treaty of many of the California/Streiner proofs over the past year has served to stimulate the market somewhat. Undoubtedly prices have risen since the Robbie Brown sale. The sale of lot 83, the 1827 N-7 proof, for

a hammer of $15,500 indicated that a substantial market still remains even for big ticket proofs. Below I list the proofs from the Dudgeon sale and their most recent auction history. It's an informative comparison. Again quality appears to reap big rewards. For the sake of comparison I have included the buyer's fee in the prices realized.

The proofs were not the only strong area as lot 99 proved. Selling one lot after the 29 N-6 bronzed proof, the choice MS65 1829 N-8 brought a hotly contested $8100. Ex Helfenstein its last appearance had been in Stacks March 1986 sale as lot 842 where it brought $1900. Another coin (lot 844 from the same sale, a fabulous mint red 1833 N-2,) brought $8800 again substantially more than the $3000 it realized in 1986. Oh, to be able to go back in time to that sale! Though were I to be accompanied back in time by my 1986 bank account, well... can't have everything. In addition to the above the 1837 N-3 MS67 :851 $2100 vs. $3550, the 37 N-10 MS64:855 $635 vs. $1625 and the 1837 N-13 MS65+:856 1600 vs. $3500 all came from the same sale. In all the middle dates brought approximately $180k. But the festivities weren't over yet. An 1840 N-1 MS63, again from the 3/86 Stack's sale, started things off by bringing $2350 against the $1000 of 8 years ago. The two tone

MS63 Ex Auction 86:1529 brought $1600 exactly quadrupling the 1986 result. One of my favorite coins in the whole sale was the 1840 N-9 with full bisecting break. A nice MS63 coin it brought $2200- more than four times the $500 from the RSB sale. Keep in mind that many of us sat back in our seats at the Robbie Brown sale and marveled at the wild breathtakingly high prices! RSB was an event and almost every lot was mightily contested. The cover coin, 1842 N-6 again Stacks 3/18/86:866, brought an even $1000 in 1986. Truly a spectacular Cent we had book bids over $5000 but the floor action drove the price to a hammer of $8600. One lot was withdrawn after I was reviewing the sale and noticed that the 1846 N-9 ex Starr and JHR which Bob and I had each independently examined was especially well struck. In fact it was so well struck that...oops this one one will have to be re-listed as "hair re-tooled to resemble an EF coin." Well,at least we weren't the first ones to have missed it.

Sometimes people question the amount of space we devote to photographing and describing the coins in our catalogues. But if it captures the right bidders' attention, well, the bidder's happy- the consignor's happy- everyone's happy . We devoted a half page to the MS62 1846 N-20 ex RSB at $500. It caught someone's attention as the bidding quickly went into four figures and was jumped to $5,000. Sure keeps the math easy! Maybe it was the Jerry Bobbe pedigree-then again maybe it was the WD pedigree. We also had quarter page photos of the 1847 N-7 with the single obv break $340 ex RSB at $105 and the 47 N-23 with the rare break which brought $130. That's to keep the researchers happy! There were many exceptionally nice circulated coins and some outstanding die states I'm unable to mention here. I hope you readers can spend some time with the prices realized and compare with your catalog notes. I always learn a lot re-examining these sales. Of course, I'm not always happy with what I learn - like it's probably too late to get any premium for all those R5+ 1851 N-38s I have in stock or- If only I'd stretched 10% I might own that pretty two-tone 47 N-21. Some things you can't be sure what to think. Will the next mint state 1856 N-21 bring $1900 or the next AU 56 N-22? That's what they brought here. To borrow a Phrase from the movie Casablanca: "It's a funny thing, the large cent market you can never be sure what it will do or why. Well, one thing's for sure: Bob and I are having a great time with these sales and our little part of the market. Thank-you to all who participated. We have another sale scheduled for January. Walter is busy building his next collection and says he'll be there. We hope you will be too.
